

The Luck of Tymora

(2 - 5 players)

Goal:

The goal is to have the highest value pool of dice

How to play:

Players roll three dice and keep the dice hidden (use the cups). Dice pools are ranked as follows (highest to lowest):

Three of a Kind	
Straight	
2, 4, 6	
1, 3, 5	
Two of a Kind	
Highest Dice	

The starting player (the person who most recently won something) can choose to stick with their pool, or can remove one of their dice and roll it in the open.

All players follow suit, either sticking with what they have or rolling.

This cycle continues twice around the table. Each time a player is allowed to re-roll either one of their dice already in the open, or bring one of their dice out from under the cup to roll in the open.

Winning the Game:

Once all players have had two opportunities to re-roll a dice, all dice are revealed and the pools are compared. In the event that two or more players have pools of the same type, such as Three of a Kind, then a pool of a higher dice value beats that of a lesser one. (e.g. 555 beats 333).

Golden Goose Recommendation:

Each player places 1gg in the pot. Add another 1gg to the pot each time you re-roll a dice. The winner takes all!
